LORAINE'S PILLS!
OR
VALUABLE UNIVERSAL MEDICINE,
OR
CURATIVE,
OF THE
French College of Health, in Paris.

THESE PILLS are now acknowledged by thousands, who have taken them daily, to be the only medicine that hardly takes the Banner from all others. This *Extraordinary Medicine* has actually done WONDERS within the past year, and is now the established world where it is more popular than any other, because no pain, or uneasiness, of any kind, in their operation, and prepare neither change of diet or care of any kind.

The attention of the readers is respectfully called to the astonishing important results from the use of these Pills. It will be seen, however, great achievements have heretofore been made by the use of this valuable medicine, and still greater, and more remarkable cures daily happen.

SWELLING OF THE BODY FROM HEAD TO FOOT, CURED!
BOSTON, (Mass.) March 19, 1844.
SIR: About a year ago, I was taken with a dropsy, with a swelling of the body from head to foot, so that I was entirely helpless. The doctor advised me to try the Lorraine Pills, for he said he did understand my case. The persuasion of friends induced me to try Dr Loraine's Vegetable Pills which in a few days, produced a great change in my system, by increasing the natural discharges, causing an appetite, relieving the pain, reducing the swelling, and giving me strength, and spirits.

A SEVERE PAIN IN BOTH SIDES GOT RID.
LOWELL, (Mass) April 20, 1844.
SIR—For the benefit of others, I feel bound to inform you, that I was cured immediately upon taking a dose of Dr Loraine's Pills. J. BROOKS.

A HACKING COUGH CONSTANTLY ANNOYED ME!
Boston, (Mass) June 1, 1844.
SIR—In February last, I took a violent cold after which, a hacking cough constantly annoyed me, and this, combined with my other maladies, rendered me truly miserable, as every body told me I was in a consumption. Since I have taken Loraine's Pills, and now every body tells me that I am well—I feel as well as ever I did.

SUGAR COATED,
OR
"Improved Indian Vegetable" PILLS,
For Intermittent, Remittent, Bilious, and Inflammatory Fevers; Heart Ache, Indigestion; Dyspepsia; Patient's Appetite; Hypochondria; Costiveness; Diarrhea; Dysentery; Bilious Colic; Worms; Fatal Sickness; Pain in the Head, Side, Back, Scrofula, Scurvy, or any Impurity of the Blood; Obstructions, or Suppression of Menses.

THESE pills never appeared a medicine, which, while it can do no harm, is calculated to do so much good. They excite a healthful perspiration, and open all the natural drains of the system. The obstruction to perspiration is the cause of a great proportion of human sufferings. These pills possess the power, in an extraordinary degree, of removing all obstructions, and restoring a healthful circulation. They are unequaled as a purgative, and as an antidote against malaria, they have a four fold action—with a discharge on the bowels, lungs, urine, and skin.

Children will not hesitate to take them; and they may be relied on, beyond any other remedy, as an effectual and safe Medicine for WORMS, and all complaints incident to childhood. More children have been cured in New York this present year, by the use of Dr SMITH'S pills, than all other medicines combined. Those in no need of forcing them down, like other medicines.

One important advantage in taking these pills is, they do not griping or produce uneasiness or any other unpleasant sensation. Pills have, in thousands of instances, produced Piles, and other consequences far worse than the disease for which they were administered. This is particularly guarded against in the combination of the many ingredients of which Dr Smith's pills are composed.

These pills are made of the purest materials; and we have the satisfaction of knowing they proved to the Medical Faculty, that they possess uncommon virtues.

The directions, and treatment of diseases, accompany every box, in a pamphlet of 48 pages.

No SUGAR COATED PILLS can be genuine without the signature of the inventor, "C. REXFAMIN SMITH, M. D., President of the N. Y. college of Health," upon every box.

Dr Smith's "Improved Indian Vegetable Pills" have proved invaluable in my family, in the cure of a violent disease of my mother, called Congestion, Dyspepsia, Costiveness, &c. I consider them invaluable. In the case of my little girl, four years old, the most happy effects have followed their use. I have never known a medicine which I could so confidently recommend as these pills.

NOTICE TO ROAD MAKERS.
THE undersigned Land Agents of the Commonwealth of Massachusetts, and State of Maine, will receive sealed proposals until the fifteenth day of January next for cutting out and grubbing a part of the Eastern Aroostook road in the township of Ashland, commencing at or near the twentieth mile tree, and extending the road to St John, at or near the mouth of Violet stream (so called) as surveyed by Wm. P. Parrott the last Summer, being a distance of about ten miles, and for making a bridge over the little Madawaska river in the line of said road.

Persons wishing to Contract, will state in their proposals, what price per rod they will cut out three rods in width, and grub at least twenty-two feet in width of that part of said road where cuttings are not necessary, and at what price per rod they will make the causeways at least fifteen feet wide where they are necessary, and smooth the whole road suitable for wheel carriages—and at what price they will build a good substantial bridge of the best and most durable construction over the little Madawaska river. We will contract for the whole together; or the bridge separately and divide the road in two equal parts as most convenient to the Contractors; and also for completing a causeway better.

When the proposals are opened, the undersigned will contract with the person or persons whose proposals are most favorable, provided the offered terms are satisfactory, and provided, that the proposals are given for ensuring the completion of the work on or before the first day of November, 1845.

☞ Political matters in Nova Scotia are increasing in interest and all parties seem to be getting up to a fever heat. The discussions are energetic and enlist a good share of talent.—The Zeal with which politics are pursued in this province awakens almost every man's mind to the subject, and perhaps the rights and duties of the several branches of the government to each other and to the people are no where better understood than by the mass of the people in Halifax and the large towns in Nova Scotia.

In New Brunswick we find also an active state of political feeling. A recent provisional appointment to the office of Provincial Secretary, to supply a vacancy by death, has produced a flame of excitement which will not probably be extinguished for a long time. This excitement, which will no doubt result in a fierce contest, is merely in fact a matter of etiquette.

These manifestations of a deep feeling generally pervading the minds of the people in the provinces of New Brunswick and Nova Scotia taken in connection with the ardent out-spoken tone in Canada, shows clearly enough that there is uneasiness, discontent and dissatisfaction among the people and which is ever ready to show itself when an occasion offers. We expect there will be piping hot times there by and by.

Premature Deaths.

To the Editor of the Whig & Courier.

In looking over the report of the Undertaker for the past year, in the Courier of Saturday, I find that out of one hundred and fifteen, the whole number of deaths reported, thirty-six or nearly one third were under the age of one year—that thirty two or nearly another third were between one and five years—in this our goodly and healthy city. I was led into a train of reflection as to the causes of this frightful mortality of infants and children. Was it the voice of a Heavenly Father that called them hence, or was it faults and foibles of erring mortals, that sent the dear infants to their long and silent home. I think surely there must be an alarming error somewhere—in the mode of living, or the mode of dress, of the mothers, or the treatment or dress of the infants, or in medical advice and prescriptions. I can hardly believe that a kind and heavenly father would decree such an alarming mortality of infantile life. I would sooner believe, sir, that the wayward conduct of living, or dress, [illegible] ment, &c. have the greater share in this sacrifice of human life. There must be some cause, some thing radically wrong somewhere, and I believe, sir, a fearful responsibility will rest upon our physicians and accoucheurs if they do not strive to ferret out the evil, let it fall where it may. Why, sir, should we find such an alarming mortality among our domestic animals would not every faculty of the mind be put in requisition to find out the cause. Why then should so much apathy exist on this subject? Are the brute animals of more importance than the animal man? I trust I have said enough to enlist some abler head and readier pen in this interesting and momentous subject. D.

Relief of the Distressed.

To the Editor of the Whig & Courier:

The Bangor Fuel Society has made choice of officers for the ensuing year, and soon the privilege will be given to all to contribute to this humane and truly benevolent fund. There are those among us who are "weary and old with service," and bowed to the earth with infirmities; the widow and orphan—hovering over a scanty fire, or for the want of any, driven to their bed or seek with meager covering: and those, too, who once possessed as strong a guarantee to affluence or plenty as those who now look with indifference upon the miseries of the poor.

Who that ever experienced the sensation of cold, or the luxury of a blazing fire, in this cold climate, in mid winter, can esteem it either than a *privilege* to aid in bringing warmth and gladness to those less favored than themselves. Or who that has reflected upon the uncertainty of this world's goods, if he knows not the pleasurable sensation of doing good, dare refuse this appeal, as it were from God, to a known duty, and the common sympathies of his nature.—Who can relish the fire-side, who can enjoy the family circle, whilst their neighbor is shivering in destitution? CHARITY.

☞ The annual meeting of the Mechanic Association for the choice of officers will be held at their Hall this evening at half past six o'clock. There is a large amount of business to be attended to and members are requested to be punctual.

☞ The New York Evening Post takes decided grounds against an Extra Session. It thinks that annexation ought to bide its time, and that the next Congress will give the Tariff but a doubtful revision.

☞ There are seven distinct propositions now before Congress for the Annexation of Texas. The best proposition will probably be for a judicious annexation.

☞ The lecture of Dr. Scudder yesterday afternoon was numerously attended by the "little folks," and they appeared deeply interested in his discourse.

Praise to the Special Agent.

To the Editor of the Whig & Courier.

I have read Gov. Anderson's Message, and upon the whole consider it a respectable document; and that full advantage be derived to the democracy, it is important that each branch should be refered to an appropriate committee.

The following paragraph should be referred to a very *select* committee, who are well acquainted with the special services and arduous duties performed by Mr Madagan, as he has done (if not the State) the democracy, same service. Who so well as he could appeal to the religious prejudices of the settlers of Madawaska? Who but him could inform those persons that Henry Clay was the man, who with his own hand fired the gun which killed those Catholic's at Philadelphia, and who if he were elected president, would rob the Irish and French Catholics, not only of their lands but also of their right of citizenship? If such services go unrewarded republics in indeed ungrateful! These things should be known and appreciated by the committee, as they are by the Governor. His views are thus expressed:—

I beg leave to call your attention to the highly favorable sentiments which are given in the report of the operations of the agent appointed under the Resolve of last session, to superintend the establishment of schools among the French settlers upon the St. John. The testimony of so considerate and competent an observer, who has had personal opportunities of judging, conclusively proves the expediency of thus undertaking to fully confirm the statements of the superintendent. Last year's favorable witness to the zeal and fidelity with which he has discharged the duties of his mission. The several reports which have been received from him during the year, give a most gratifying picture of the success which has rewarded his labors, and justify the hopes, that a judicious prosecution of the objects contemplated by the Legislature, will produce the happiest effects.

Professor Liebig.

The following is an extract from a speech of this distinguished gentleman, at a recent dinner to which he was invited, in Glasgow, Scotland:

"Practical experience possesses unquestionable value; but it is like a vessel, to which, in the form of *Science*, the compass or the pilot is wanting; it is a treasure which cannot be inherited. Science enables us to bequeath this treasure to our children, and it enables our children to increase the store. Science teaches us to recognize the food of plants, and the sources from which it is derived. This knowledge alone enables us the true masters of the soil—the lords of our capital. We can now see where we are guilty of waste, and where we are too sparing. The great truth that animal manures are nothing else but the salts of the food produced from our fields, consumed or burned in the bodies of men and animals, has given the chief direction to all the modern improvements of agriculture. Who would have thought it possible, a few years ago, that gas-works would yield a powerful manure. We now know on what the exhaustion of our soils depends: it is, the most precious ingredients of the soil which we remove in the crops, and thus impoverish our fields. By analysing the ashes of plants, we learn what we must replace in order to restore the original fertility of the soil."

Africa and Peru supply us with the mineral elements of bread and flesh, in guano; and chemical works now produce the other mineral substances which are indispensable to turnips and potatoes. (Cheers.) It is evident that the present age has entered upon a new path; we have now to do with the real, not with the imaginary value of manure. (Applause.) As we have now learned how to measure the value of an acid or an alkali, so we can now ascertain the true value of a manure. This, therefore, is precisely what we must expend on the soil, in order to obtain a profit, for the capital of the farmer consists of his labor and his manure. Much, certainly, remains to be done. The mineral food of the plants of all countries must be ascertained by the analyses of their ashes; we must determine which substances are essential, which accidental; we must endeavor to find out in which plant one ingredient or another may be replaced, as lime by magnesia, or potash by soda."

☞ Governor Briggs, of Massachusetts, has sent to the Legislature a special Message relating to the treatment of Mr. Hoar at Charleston, S.C. and the questions at issue between Massachusetts and the States at the South relative to the imprisonment of free colored citizens of the former.

☞ The Providence Gazette states that Gov. Dorr, at the request of his counsel, has signed an application for a Writ of Error, in order to bring his case before the Supreme Court of the U. States. We doubt very much whether a Writ of Error will lie where Habeas Corpus could not stick.

☞ While Mr Cushing was residing at Macao his house was attacked by robbers five times, and entered by them on one occasion. The Legation were obliged to be constantly armed for self-defence.

☞ At the organization of the Common Council of Boston, Peleg W. Chandler, Esq. formerly of this city, was unanimously chosen President.

CONSUMPTION.—Valuable statement in relation to Consumption, from Dr Butler, Boston. Dr Butler, Boston, states in a note to the American Agent of Buchan's Hungarian Balsam, that he administered that medicine to one of his patients, a lady, who had suffered for several years from a severe Cough, pain in the side, and raising frequently very bad matter, tinged with blood. She had tried various medicines for her complaint, in some of which Opium was a principal ingredient, with no good effect. Some of these would check her cough, and of course increase the fever and debility. The Hungarian Balsam at once changed the whole character of the symptoms, and she was rapidly regaining her long-lost health. Dr B. says he is satisfied that this is a most excellent medicine for Diseases of the Lungs. For sale by

Competition is the Life of Business!

SCENE AT THE BANGOR HOUSE.

SCENE 1st.

ENTER STRANGER—Can you inform me where I shall go to find the Main Pillar of Oak Hall?

CITIZEN Yes, sir, at No. 15 West-Market Place.

STRANGER—I understand he sells good Clothing at remarkably low prices.

CIT.—I know that, sir, from experience; I purchased an entire black suit of him for $15 the same kind I last purchased which I had to pay $25 for and it seems as though I could never wear them out.

STRAN.—Receive my thanks.—(EXIT STRANGER.)

SCENE 2d.

MAIN PILLAR OF OAK HALL.

PLACE.—15 West-Market Place, BANGOR.

"CLEAR THE TRACK."

ENTER STRANGER—Salesman. How do you do, sir? What can we show you, sir, in the shape of Clothing?

STRANGER—Is this the Main Pillar of Oak Hall?

SALESMAN—Yes, sir.

STRAN.—My friends have bought of you and they all say you are the cheapest and fairest man to deal with in Bangor. I want you to show me a good suit of cloths.

Stranger purchases leaving delighted with his good fit, and politeness shown by the salesman and astonished at having so good a suit of cloths at so small a sum of money.

Keep the Ball Rolling!

Custom-Made Clothing at Auction Prices.

Owing to the vast multitude who have for the past month visited the

EMPORIUM OF FASHION,

OR

Main Pillar of Oak Hall,

It is expected that upwards of 10,000 will visit this Popular Establishment the ensuing winter, and the Proprietor begs leave to inform them that he has made ANOTHER ADDITION to his extensive Clothing room and will be able to clothe all that may favor him with a call. The reason why Clothing can be sold at this Establishment so much lower than at any other place is this, my retail sales are about ten times the amount of any other Clothing Store in Bangor, and we adhere strictly to our motto:

"Large Sales Small Profits."

The following is a list of some of my remarkably low prices:

Good Frock and Dress Coats, from	7 to $14,00
Good Over Coats, from	3 to $18,00
500 Sacks, good article,	8,50
Spanish Cloak, from	5 to 16,00
1000 pairs Doeskin Pants, from	3 to 4,50
150 Rich Gid silk Velvet Vests,	3,50
800 fig'd silk and satin Vests,	2,25
650 Valencia Vests, good article,	1,00
300 common Velencia,	,75

A large lot of Boys' Vests,

FURNISHING ARTICLES will be sold at about the customer's own price.

☞ WHOLESALE DEALERS will find at this Establishment every description of

READY-MADE CLOTHING,

IN ANY QUANTITY.

BOYS' DEPARTMENT.

Overcoats, Sacks, Vests, Pants of every size and quality, will be found here at astonishing low prices—together with hundreds of other articles too numerous to mention.

Grand Illumination every evening until further notice.

Beware of Imposition!

Caution, not to mistake the Place,

As since my place of business has become so noted, as the Largest and Cheapest Clothing Establishment, under the name of

Main Pillar of Oak Hall,

An attempt may be made in Bangor, Boston, or elsewhere to impose upon the public by assuming the name I have adopted, leading the community astray and causing them to believe that their's is the fat famed MAIN PILLAR OF OAK HALL, where Clothing is made in the best style, and sold at such extremely LOW PRICES.
